DETAILED ACTION

Status of the Application

Receipt of the Response to Non-Final Office Action and Applicant's Arguments, all filed 01/29/10 and the Information Disclosure Statements (IDS) filed 12/18/09 and 04/19/10 is acknowledged.

Claims 1-8 are pending in this action. Claim 1 has been amended. New claims 7 and 8 have been added. Claims 1-8 are allowed.

Information Disclosure Statement

The information disclosure statement (IDS) submitted on 12/18/09 and 04/19/10 was filed after the mailing date of the Non-Final Office Action on 09/02/09. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statements are being considered by the examiner.

* * * * *

Allowable Subject Matter

Claims 1-8 are allowed.

The following is an examiner's statement of reasons for allowance:

The primary reasons for allowance are that the prior art of record (Kim *et al.* - WO 01/87276; Brantl *et al.* - US 4,826,686; McQuinn US 5,113,860; Yamaguchi *et al.* - US 5,820,877 and Miller, III *et al.* - US 2004/0086551) does not disclose nor fairly suggest or teach a fentanyl patch as instantly claimed wherein the drug layer 'consists essentially of' and/or 'consists of' fentanyl (or its salt), methyl vinyl ether-maleic anhydride copolymer as the adhesive agent and a thickener selected from one of hydroxypropyl cellulose, hydroxypropylmethyl cellulose and hydroxyethyl cellulose.

Art Unit: 1615

Applicant, in their response filed 01/29/10, has limited the drug layer of the instant patch to the components described above, based on the “consisting essentially of” and/or “consisting of” language now employed. This language excludes the required additional elements and/or features disclosed in the preparations of the art. Consequently, the instant invention is rendered non-obvious and patentable over the cited art of record.

The instant invention demonstrates an improvement over the formulations of the art in that, for example, it does not need any complex procedures when it is applied; is comfortable in the oral cavity; can quickly increase the serum concentration as the drug is absorbed; makes less transfer of the drug into the gastrointestinal tract by preventing the drug release into other parts of the oral cavity except the applied region; is easily removable; is usable as a rescue preparation for pangs during therapy for cancer pain and is highly safe.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
